Project Type: Entertainment App

MovieBlast App is an entertainment-focused project designed to give users a simple way to discover and access movies and web series across supported devices. The project emphasizes content organization, search, categories, subtitles, video playback, and a straightforward user interface. It also includes features such as watchlists and different video-quality options. The project aims to make entertainment discovery more convenient while providing a consistent experience across devices. Users can learn more about the project and its current release through the official website. The site currently lists MovieBlast App version 2.6, updated in June 2026.
